ABOUT ME

Versatile Full Stack Website Developer with a strong focus on building responsive, user-centric, and business-driven web solutions. Experienced in both front-end and back-end development, delivering clean, efficient, and scalable code that powers modern digital growth.

WORK EXPERIENCE

Kachi Lab

Senior level | CTO - Backend Engineer
2026-03-01 | Currently working here

As Chief Technology Officer (CTO) at FootNFTs, I oversee the companyâ€™s overall technology strategy, including development, deployment, and maintenance of blockchain-based NFT platforms. I lead a team of developers, manage system architecture, ensure security and scalability, implement innovative solutions, and coordinate with product and business teams to deliver high-quality digital experiences. I also monitor emerging technologies, optimize workflows, and drive technical innovation to support the companyâ€™s growth and operational efficiency.

FemTech Technologies

Executive level | Founder
Lagos , Belarus
2024-12-01 | Currently working here

â€¢ Design and develop responsive, high-performance websites and web applications using HTML, CSS, JavaScript, PHP, and MySQL. â€¢ Collaborate with small businesses and organizations to establish strong online presence through e-commerce solutions and corporate websites. â€¢ Manage complete project lifecycle â€” from concept, UI/UX design, and front-end integration to back-end functionality and deployment. â€¢ Optimize websites for SEO, speed, and mobile compatibility to enhance user experience and online visibility. â€¢ Provide technical support, hosting setup, and maintenance for client websites. â€¢ Lead a small creative team focused on brand development, digital marketing, and content optimization.

Atayese FM

Entry level | ICT Engineer
Ogun Nigeria , Algeria
2024-09-01 | Currently working here

Oversee and maintain the stationâ€™s ICT infrastructure, including networking, hardware, and broadcast systems. â€¢ Manage server configurations, data backups, and network security to ensure uninterrupted broadcast and online operations. â€¢ Develop and maintain the stationâ€™s official website and digital platforms for live streaming, news publishing, and audience engagement. â€¢ Provide technical support to on-air and administrative teams, troubleshooting software, hardware, and connectivity issues. â€¢ Collaborate with the content and media departments to implement digital tools that improve workflow and audience reach. â€¢ Ensure system efficiency through regular maintenance, software updates, and hardware upgrades.

TenderMinds Private School

Senior level | Computer Teacher
Nigeria , Nigeria
2023-08-01 | 2026-02-01

As a Computer Teacher, I plan and deliver engaging lessons on computer literacy, programming, and digital skills to students. I design curriculum materials, assess student performance, and provide individualized support to improve learning outcomes. I maintain classroom technology, teach safe and responsible use of digital tools, and mentor students on practical applications of software and coding. Additionally, I integrate new technologies into lessons, monitor student progress, and collaborate with colleagues to enhance the schoolâ€™s computer education program.
